Relevant Experience

SDE II - Flutter • **Sunstone** Mar 2023 — Mar 2026
Flutter Developer Mar 2022 — May 2023

- **Led mobile engineering**, building high-performance Flutter apps with native iOS/Android WebViews, bridging layers, and advanced streaming features.
- Integrated **Firebase (FCM, Remote Config, Dynamic Links, Analytics, Google Auth)** to improve rollout speed, notifications, and mobile insights.
- Built a **custom multi-provider video player** (YouTube/Wistia/M3U8) with adaptive streaming & analytics, increasing video completion by **32%**.
  Developed a **BLE-based attendance system** used by **16,000+ students daily**, automating check-ins and eliminating manual effort.
- Created **dynamic JSON-driven forms** supporting instant UI generation across mobile apps, cutting development effort by **85%**.
- Built and optimized **REST APIs (Node.js, Express)** with caching, queues, and rate-limiting, improving performance by **40%**.
- Implemented CI/CD for iOS, Android, and Web (Fastlane, Azure DevOps, GitHub Actions), reducing deployment time by **60%**.
- Built a **custom LMS for 8,000+ students** with video, quizzes, assignments, coding assessments, and real-time progress tracking.
- Integrated Moodle with a custom auto-login solution, reducing **third-party cost & maintenance by 90%**.
- Developed an **AI Call Audit System** performing the work of **2 FTEs**, enabling batch processing and reducing turnaround time by **70%**.
- Built a **Python backend for AI-driven content feedback**, improving teaching efficiency and engagement.
- Integrated analytics platforms (**MoEngage, Mixpanel, Branch**) to enhance user insights and attribution accuracy.
- Built **Selenium scrapers**, automated data processing, and implemented **Clean Architecture** across projects.
- **Managed 2 engineers**, owned critical modules, led architecture decisions, and improved team delivery velocity.

Flutter Developer • **Reliance Jio** Aug 2021 — May 2022

- Contributed to core development for **Jio News**, building Flutter screens, optimizing API-driven content loads, and improving page rendering speeds by **35%**.
- Built and maintained **automation test suites** for JioMeet Pro using **Cucumber BDD + Java**, increasing regression coverage by **70%** and reducing manual QA effort by **60%**.
- Automated critical JioMeet Pro workflows to ensure stability across video calling, chat, and collaboration features, improving release confidence and catching issues **40% faster**.
- Collaborated with design, product, and backend teams to refine UX flows and enhance app responsiveness, resulting in **higher engagement and smoother navigation**.

Flutter Developer • **JSimple** Feb 2021 — Aug 2021

- **Implemented a facial recognition service** for automated attendance marking, improving accuracy and reducing manual verification effort.
- **Used the BLoC pattern** for scalable state management and created **multiple app flavors** to support diverse client and environment configurations.
- Built **complex, high-performance UIs**, including a **3D user-skeleton view for medical analysis** with interactive markers to track body parts and test results.

Skills

Programming Languages
Dart, Java, TypeScript, Python, JavaScript, PHP

Libraries & Frameworks
Flutter, BLoC, Getx, BLE, Android, iOS, Hive, SQLite, MySQL, MongoDB, GeoLocation, Nest.js, Next.js, Node.js, N8N, Agentic Workflow, AI agents

Tools & Platform
Git, Github, Azure, Firebase, AWS, Docker, Branch SDK, Mixpanel, MoEngage, Moodle, CI/CD, Figma

Projects

ClipMind(Live)
AI-powered clipboard manager for macOS with instant history, smart actions, and one-click rewrite features—built natively in Swift.

Page Analytics Flutter package(Live)
Flutter package for precise page view duration tracking with a simple setup

HighPriestess App (Live)
AI-powered tarot reading mobile application featuring personalized tarot interpretations, subscription-based premium access, integrated payment gateway, and an in-app shop. Built with Firebase for authentication, real-time database management, user data storage, and purchase tracking.

Education

Gyan Ganga Institute of Technology
B.Tech CSE
2017-21 | 7.8 CGPA

Interests

Programming, App enthusiast,
Tinkering with Tech,
Sci-Fi, Tech & Fantasy series,
cricket, video games
